EIS/AIS

-Estimated: gtkblist.c

line 2836: create_pango_layout(const char *markup, int *width, int *height)

line 3082:pidgin_blist_create_tooltip_for_node(GtkWidget *widget, gpointer data, int *w, int *h)

line ?????: gfree function (never located)

and many others before the general location was found...

-Actual: gtkblist.c

line 2866: create_tip_for_node(PurpleBlistNode *node, gboolean full)

Estimated Time vs. Actual Time

- estimated around 3-4 hours
- took about 10 hours
- Simple change took a long time to locate
- spent more than half the time looking in the wrong locations

Tests

- To reproduce we just have to mouse over a name in facebook chat.
- To verify the fix we needed to do the same thing
