

Fix #4 File Rejection Shown Twice

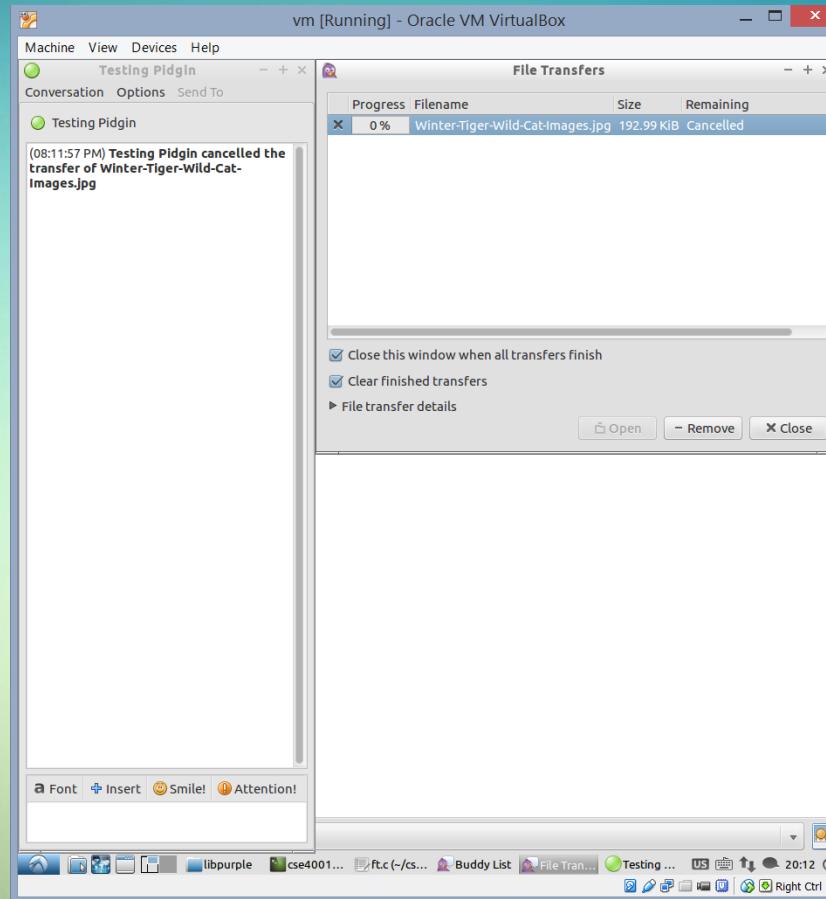

Source File Changed

ft.c, 1 line “Commented out”

```
purple_xfer_error(purple_xfer_get_type(xfer), account, xfer->who, msg);

/** cancellation dialog */
//purple_xfer_error(purple_xfer_get_type(xfer), account, xfer->who, msg);
```

After

EIS/AIS

EIS:

gtkconv.c

pidginstock.c

ft.c

- purple_xfer_cancel_local()
- purple_xfer_is_canceled()
- ask_accept_cancel()

AIS:

ft.c (Line 1596)

- purple_xfer_error()

Estimated Time vs. Actual Time

- Estimated Time: 3 hours
- Actual Time: 4 hours
- grep made it easy to locate the file that is responsible for remote and local cancellations. However, the file had multiple cancellation functions, so finding the error dialog took some time.

Tests

Testing was done on Yahoo, because AIM and some other protocols wouldn't send files.

Two, Yahoo accounts were created for testing.

A file was sent from one account to another and then cancelled to check if the dialog still there or not.
